

**ADVANCED
FRACTURES AND
INSTABILITIES**

14 -15 November 2024

Trauma and disorders of the elbow and forearm

**Course in management of trauma and sequelae
with practical exercises on human specimens.**

**Course format: Case based discussions and
related lectures followed by practical exercises.**

*Fakultet:
Professor Lars Adolfsson
TBD*

————— A cooperation between —————

**Ortopedkliniken, US Linköping
Swemac Education**

Preliminary program

THURSDAY

I. 8:30 INTRODUCTION

8:45 CASE BASED LECTURES

- Considering pathomechanics
- Wrist fractures; acute management and understanding of pathomechanics
- Chronic instability

9:30 COFFEE

10:00 CASE BASED LECTURES

- Management of “atypical” fractures of the distal radius
- Fractures of the distal ulna and “peri-ulnar” instability
- Forearm fractures
- Elbow dislocations
- Radial head fractures
- Longitudinal forearm instability

12:00 LUNCH

II. 12:45 DISSECTIONS (WITH FILM DEMOS OF PROCEDURES)

- Recon procedure for radial head and elbow instability
- Internal fix of distal radius and ulna; dorsal approach, volar approach to ulna, fixation of volar lip fragments
- DRUJ; dissection of capsule, 6:th extensor tendon sheath, peripheral TFCC tear, detachment from ulnar fovea, distal oblique band.
- Forearm plating and nerve identification

17:00 AFTER WORK | CASE DEMONSTRATIONS

19:00- COURSE DINNER

FRIDAY

- III. 8:30 **CASE BASED LECTURES**
- Fractures of the proximal ulna
 - Posteromedial instability
 - Terrible triad injuries
 - Coffee
- IV. 9:45 **WORKSHOP**
- 12:30 **LUNCH**
- V. 13:15 **CASE BASED LECTURES**
- Elbow instability
 - Elbow stiffness
 - Salvage procedures
- 15:00 **CLOSURE**

Course fee: SEK 13.000 excl. VAT
